

An Analogy for: How Gravity “Squeezes” Energy From Matter

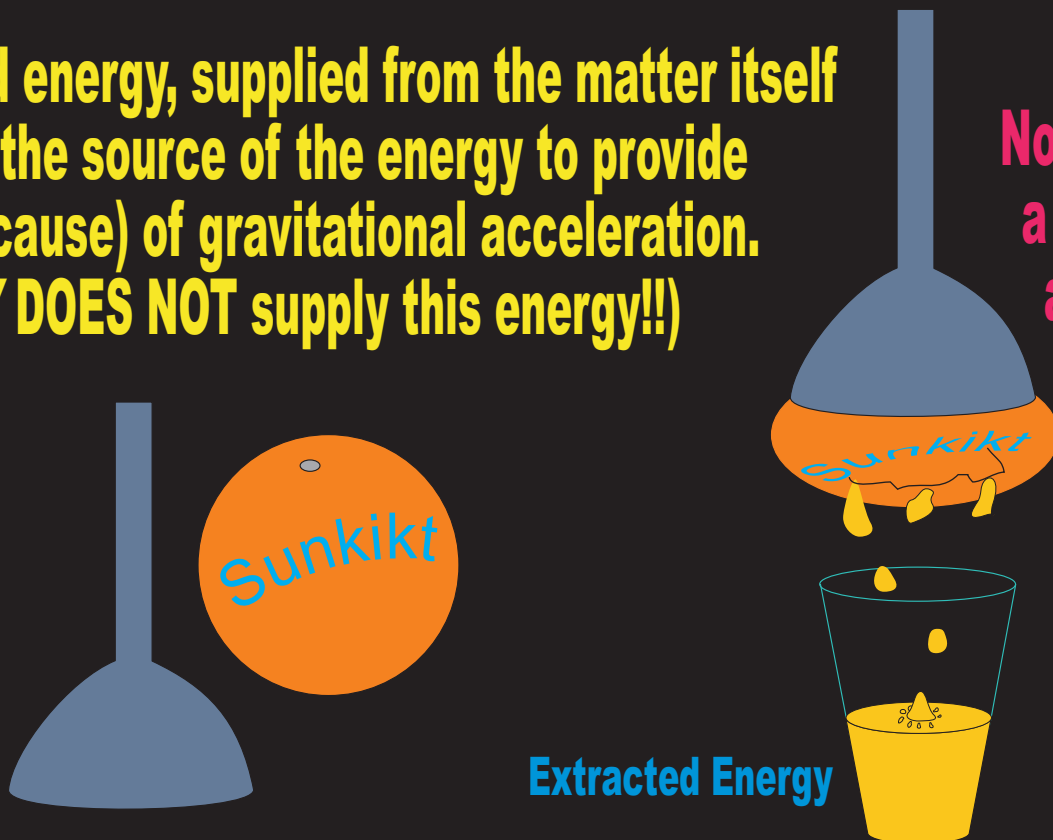

Whenever gravity bends, squeezes, or warps matter; that matter loses (oozes) some of it's stored energy.

Note: The effect is shown GREATLY EXAGGERATED.

As more and more energy is released, the real-time energy “clock” for the matter continues to slow-down.

This freed energy, supplied from the matter itself becomes the source of the energy to provide (the real cause) of gravitational acceleration. (GRAVITY DOES NOT supply this energy!!)

Note: Gravity is not so much a separate *FORCE*, by itself as the force is an effect, a result of the action of the increased curvature on matter.

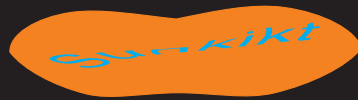

An Analogy for: After Gravity “Squeezes” ALL the Energy From Matter (at the Schwarzschild radius) WHAT happens THEN?

After gravity curves [bends, squeezes, or warps] matter so much that matter loses (oozes-out) ALL of it's stored energy as *KINETIC* energy, What happens then?

Before

After

Absolutely NOTHING!!
Once ALL the available orange juice (real-time energy) is GONE, that's it!!

Extracted Energy
100% of all there is

At the Schwarzschild radius, the real-time energy “clock” for matter is STOPPED. No further emission can occur! ALL of the available energy has been released by gravity!

Note: Gravity loses the “handle” on matter after ALL of the real-time has decreased to ZERO!! Gravity loses the ability to PULL matter further inward, back into the region of active real-time.
